

## Cybersecurity A Critical Business Strategy

Cybersecurity should support your desired business outcomes while helping to protect the overall business. The NIST Cybersecurity Framework (CSF) provides a holistic program model with a strategic lifecycle view of your management of risk. Our assessments use the CSF to get you started in the right direction.

Our quick look approach is designed to be affordable and provide you with exactly what you need to do to improve your cybersecurity posture.

## QUICK LOOK ASSESSMENT APPROACH

### 4 Steps to Improved Security

-  Our interactive questionnaire guides you through the information about your current cybersecurity program
-  Edwards assessment experts analyze the results and determine your gaps
-  We develop and deliver a prioritized roadmap of projects for your organization to fill the gaps
-  A consultation with our cybersecurity experts provides a tailored solution

### The Quick Look Advantage

-  We provide a 60 minute consultation to answer questions and outline your next steps, providing you with the knowledge to make well informed business choices. A Facilitated Quick Look offers up to 16 hours of consulting support.
